August 2017

Dear Friends,

225 years is a very remarkable accomplishment in the life of a parish. It marks the fact that for generations people of the city of Kingston have looked to this congregation to provide a place to feed their souls. As the oldest parish in Kingston, it also marks that we have held a very central place in the story of this city as well. How do you celebrate such a significant anniversary in a way that can continue that tradition of centrality that the Cathedral has enjoyed?

The executive committee has looked at that question, and has marked the repair of the clock in the Cathedral tower as a project that we would like to undertake as a way of celebrating our history, while also reaching out to the city of Kingston today.

The clock is a beautiful and historic part of our building. Its return to full operation will celebrate where we come from. But it is also a focal point that when functioning, draws people's eyes and ears to the Cathedral in the present day.

It is my hope and prayer that you will give consideration to this project and consider giving some support to help us to restore the clock. More information from the Executive Committee is attached for your information.

Faithfully

The Very Rev. Donald A. Davidson A.C.S.C., B.A., M.Div.
Dean of Ontario
Rector of Kingston
Incumbent of the Cathedral Church of St. George
